The Live Pool Tournament or League Player Scoring Solution that adds excitement and instant results for the benefit of both players and organisers at local or national events.

Pool events can be extended beyond the tournament participants to their friends, family and colleagues

PoolAppLive increases the excitement of a tournament or competition to the participants by providing a live leaderboard. It also extends the whole experience beyond those playing in it. Now non-participants, friends, family, and colleagues can be invited to join in any event underway. PoolAppLive is designed for league and tournaments to capture players' scores on smart phones or tablets so that "live" scores and results can be provided - on the smart phone or tablet and on the tournament's own large screens.

It's simple for competition organisers and participants to use irrespective of their technical experience. Instant results can be linked to websites, social media sites and email. Organisers can email results and statistics to participants so that a record of their experience can be retained.

BENEFITS

Organise exciting & memorable events

Make your event stand out from other similar ones

Maximise branding opportunities

Provide up to date results to a broader audience

Benefits to Tournament or Competition Organisers & Sponsors

- The Live Leaderboard makes the event you are sponsoring a cut above other events that don't offer such a facility and an even more memorable occasion.
- The organisers/sponsors running the event can maximize the branding of the company or club sponsoring it by using logos, images and online advertising on the scoring devices and the leaderboard.

- Pool events can be extended beyond the tournament participants to their friends, family and colleagues who have Internet connectivity.
- Potential participants who can't attend the event can still see how the tournament or competition is progressing.
- Up to date results can be linked to websites, social media sites and email making the excitement of the event available to a much broader audience.

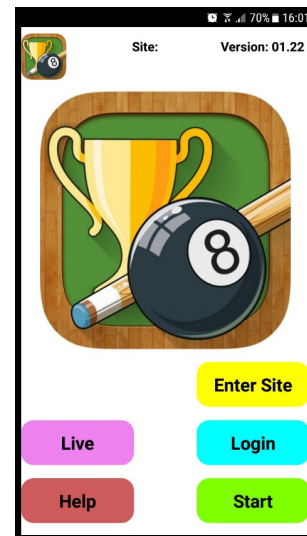

The Administration screen provides all the controls necessary to quickly and easily set-up & manage a tournament or league

Sapphire Solutions Ltd.

PoolAppLive has been developed by Sapphire Solutions Ltd. which has a team of IT professionals experienced in developing, marketing and selling Mobile Applications on a variety of smart phones and tablets for a number of different uses, including those required by multi-national companies.

The login screen on a smart phone

- The final results are known immediately to the organisers and can be made available to the participants when appropriate to the event.
- Results and statistics can be emailed to participants so that they can retain a record of their experience on the course.
- The stress involved in organising and administering a tournament or competition is practically eliminated by providing a framework to set it up, run and finalise the details of the whole event.
- The processes for tournament and competition set-up are streamlined to minimize overall set-up time and tallying the results.
